RE: Area 6: Proposed Revisions

This document is another set of revision proposals from the Consistency Task Force. It deals with Area 6, Series. The document consists of four parts:

- A. Summary of Decisions and Issues for Discussion.** This section lists some of the major changes proposed, as well as other issues that might be worth discussion by CC:DA. It also includes a list of issues that are deferred for future discussion or referred to some other group for resolution.
- B. The revisions proper.** The proposed revisions are marked up in the usual way. Only rules to be revised are included. Prior to each section is a listing of the changes proposed. The rationale for the change is given where it goes beyond consistency. In the revision proposals, the unique rules in Chapters 2–12 are highlighted in **yellow**.
- C. A clean copy.** The clean copy includes all the chapters in Part I (except Chapter 13). Most of the rules included in the clean copies are completely unchanged, and do not appear in the revisions section of this document. They are included in the clean copy for ease of consultation.
- D. Appendix: Analysis of the Area 6 rules.** This is a summary of the Task Force's analysis of the Area 6 rules. The full analysis is available in *CC:DA/TF/Consistency/Area 6/2*.

A. Summary of Decisions and Issues for Discussion

Outline of Area 6 rules: Unlike other areas, the X.6 rules in Chapters 2–12 consist of the preliminary (punctuation) rule [X.6A] and a single rule for “Series statement” [X.6B] referring back to 1.6. Only in Chapter 1 are there separate rules for each ISBD element. See the list of major changes below for a discussion of the navigational/reference structure of Part I as it relates to Area 6.

The following is an outline of the rules in Chapter 1:

1.6. SERIES AREA

- 1.6A.** Preliminary rule
 - 1.6A1.** Sources of information
 - 1.6A2.** Punctuation
- 1.6B.** Title proper of series

- 1.6C. Parallel title of series
- 1.6D. Other title information of series
- 1.6E. Statements of responsibility relating to series
- 1.6F. ISSN of series
- 1.6G. Numbering within series
- 1.6H. Subseries
- 1.6J. More than one series statement
- 1.6K. Changes in series statement

Summary of decisions: The specific changes are described at the beginning of each of the sections below.

Issues for discussion: The following issues may merit particular attention (the numbers refer to revised rule numbering):

- ✓ *Navigational references within Part I of AACR:* At the April JSC meeting, it was tentatively decided that references from chapters 2–12 back to the rules in chapter 1 would be made for each ISBD area, but not for each element within an area if there were no special rules for that element in most chapters. This practice follows that already in place for Area 6: there is no subrule 2.6G, for example, referring back to 1.6G for rules on series numbering. A single general rule at X.6B1 in each chapter refers back to the 1.6 rules as a whole. For area 6, the only special rules are at 11.6B1, 12.6G2 and 12.6K.

In its response to 4JSC/ALA/49, ACOC suggested that chapter 1 include references forward to any special rules in chapters 2–12. Such references have been added here at 1.6B1, 1.6G2 and 1.6K.

- ✓ *FRBR terminology:* At the April JSC meeting, tentative decisions were made regarding the use of FRBR terminology in chapter 1. The Task Force were asked to incorporate these revisions in its proposals and to extend them across the other chapters. In the case of Area 6, only the rules in chapter 1 required revision.
- ✓ *Examples:* At the April JSC meeting, it was decided that only examples illustrating special rules would be retained in chapters 2–12; general examples would be moved to chapter 1. It was decided that decisions on which examples should be retained in chapter 1 would be left for the general review of examples for the new edition. Therefore, these proposals simply move the examples to an appropriate rule in chapter 1; only exact duplicates (the same series title) have been eliminated. The text of the revision indicates where the examples added to chapter 1 come from and where the deleted examples in the other chapters have been moved.

- ✓ *Chapter 4:* Chapter 4 (Manuscripts) does not contain any rules for Area 6. We are recommending that 4.6 be added to make that chapter consistent. We recognize that in archival descriptive practices the term *series* is used for component parts of an archival collection, and that series as defined in AACR2 are unlikely to occur in a manuscript. However, we feel that the addition does no harm and might even be applicable on occasion.
- ✓ *Punctuation:* As with the other areas (except Area 3), we are recommending that the punctuation rules be removed from Chapters 2–12, as they are consistent in all chapters.
- ✓ *Punctuation of examples:* Because X.6B rules in Chapters 2–12 are not broken down by ISBD element, all of the examples in these chapters are complete, while most of those in Chapter 1 are *not* complete and therefore are not surrounded by parentheses. We recommend that parentheses be added to the examples in Chapter 1, using the bold ellipses to indicate where additional information has not been included in the example. Unfortunately, the font used for the examples in this document does not show bold text.
- ✓ *Unique rules:* There are special rules in Chapters 11 and 12. (a) 11.6B1 has to deal with two categories of series: those in which the microform appears, and (for reproductions) the series in which the original appeared. (b) 12.6B1 adds the traditional rule that series numbering of individual issues/parts of a serial are not recorded; 12.6B2 deals with changes in series statements for serials and integrating resources. We feel that these special rules are justified and recommend that they be retained (although a revision is needed in Chapter 11 to correct an error).

Issues deferred for future consideration or referred to other groups:

- ✓ *Examples:* The examples in Chapter 1 have been revised to include the surrounding parentheses and marks of omission (where they might be needed). The examples have not been checked to determine whether they are in fact incomplete. This should be done as part of the general review of examples for the new edition of AACR.
- ✓ *Multiparts:* 12.6B2 covers only changes to series statements that represent either serials or integrating resources. AACR2 needs to provide for changes to series statements that represent multiparts. The Task Force expects this issue to be dealt with by the Library of Congress in its continuing work on the rules for multiparts in AACR2.
- ✓ *1.6G:* The Task Force notes that there is only one case in which a reference is made from the rules for series numbering (1.6G) to the rules for numbering in chapter 12 (12.3). It strikes us that a general linkage between these two sets of rules might be useful, as 12.3 covers cases that are relevant to series numbering but are not covered in 1.6G. However, the Task Force did not feel that this issue was within their charge, and simply raises the question for the record.
- ✓ *1.6G2:* A revision to this rule is needed to deal with integrating resources. Although the revision proposed below generalizes the rule to cover all serials, 12.6B1 (to be renumbered 12.6G2 in our proposal) is limited to serials. We feel that extending it to integrating resources requires additional consultation and should be a separate proposal.

X.6. SERIES AREA: Punctuation rules

1. With the addition of 4.6, all of the punctuation rules in Chapters 1–12 are identical. Pursuant to our mandate from JSC, delete these rules and replace with a reference to 1.2A2.
2. Since the punctuation rules in Chapters 2–12 consist only of a reference and, pursuant to the JSC agreement that consistent numbering is desirable, use the number X.2A2 for the punctuation rules.

1.6B–J. Series statements: Chapter 1 rules

1. Prescribed punctuation (parentheses) has been added to the examples in Chapter 1, to be consistent with the examples in the other chapters. Where appropriate, boldface marks of omission are used to indicate examples that may be incomplete (we apologize that the font used for examples does not show boldface text). The Task Force has not checked the examples to determine whether they are in fact incomplete; our working premise is that series statements that include numbering are likely to be complete and that series statements that do not include numbering might be incomplete. Whether each example is in fact complete is something that should be checked during the general review of the examples for the new edition of AACR.
2. The changes in 4JSC/Chair/76/Chair follow-up/4, as modified by the LC response have been made. No changes such are needed in the other chapters.
3. All of the examples under the general X.6B1 rules have been moved to chapter 1 because none of the examples illustrates the application of a specific rule. Some attempt has been made to move the examples to an appropriate subrule in 1.6. However, both the retention and placement of examples will need to be reviewed during the general review of examples for the new edition of AACR.
4. Rules have been added at 1.6B1, 1.6G2 and 1.6K1 referring to the special rules at 11.6B1, 12.6G2 and 12.6K1 respectively (as per the suggestion made in the ACOC response to 4JSC/ALA/49). The proposed revision to 1.6G2 also generalizes an existing reference (for “periodicals”) to cover all serials.

1.6B. Title proper of series

1.6B1. If a bibliographic resource ~~an item~~ is issued in a series, transcribe the title proper of the series as instructed in 1.1B (see also 12.1B).

1.6B2. If different forms of the title of the series (other than parallel titles) appear, choose the title given in the first of the prescribed sources for the series area as the title proper of the series. Give the other form(s) in the note area if of value in identifying the bibliographic resource item.

If the title of the series does not appear in the first of the prescribed sources of information and different forms appear elsewhere in the bibliographic resource item, choose the title given in the other prescribed sources in the order of preference for the sources (e.g., if different forms appear in the second and third sources, choose the one appearing in the second source).

1.6C. Parallel titles of series

1.6H2. If the main series and subseries titles appear in more than one language or script, choose as the title proper for the series area the main series and subseries titles in the language (or the clearly predominant language) of the particular bibliographic resource item being catalogued. If this criterion is not applicable, choose the first main series and subseries titles that are in the same language as each other.

1.6H3. If a phrase such as “new series,” “second series,” etc., appears with an unnumbered series, transcribe such a phrase as a subseries title. If it appears with a numbered series, transcribe the phrase as part of the numbering of the series as instructed in 1.6G1 (see also 12.3G).

1.6K1. For *serials and integrating resources*, see 12.6K1 for instructions for describing the addition, deletion, or change on a subsequent issue, part or iteration.

X.6B. Series statements: chapters 2–12

1. A general rule referring back to 1.6 has been added in chapter 4.
2. The examples under the general X.6B1 rules have been moved to chapter 1 in cases where they do not illustrate the application of a specific rule (as they do at 12.6G2).
3. The special rule for microforms in 11.6B1 that distinguishes between the series in which a microform appears and the series in which an original reproduced in microform appeared has been retained. The reference to 11.7B12 in this rule is incorrect; notes relating to the original have been consolidated in rule 11.7B22 and the reference here should be to that rule.
4. The special instruction in 12.6B1 not to record series numbering for individual issues of a serial has been retained. Two of the examples have been retained, and explanatory text has been added. This rule has been renumbered 12.6G2 to emphasize that it is a special application of 1.6G2.
5. The rule in chapter 12 on changes in series information has been retained. The rule has been renumbered 12.2K to emphasize that this rule does not correspond to any rule in chapter 1.

C. Clean Copy of Revised Rules

Chapter 1

1.6. SERIES AREA

Contents:

- 1.6A. Preliminary rule
- 1.6B. Title proper of series
- 1.6C. Parallel titles of series
- 1.6D. Other title information of series
- 1.6E. Statements of responsibility relating to series
- 1.6F. ISSN of series
- 1.6G. Numbering within series
- 1.6H. Subseries
- 1.6J. More than one series statement

1.6A. Preliminary rule

1.6A1. Sources of information. Take information recorded in this area from the chief source of information or from any other source prescribed for this area in the following chapters. Enclose any information supplied from other sources in square brackets, within the parentheses enclosing each series statement.

1.6A2. Punctuation

For instructions on the use of spaces before and after prescribed punctuation, see 1.0C.
Precede this area by a full stop, space, dash, space.
Enclose each series statement (see 1.6J) in parentheses.
Precede each parallel title by an equals sign.
Precede other title information by a colon.
Precede the first statement of responsibility by a diagonal slash.
Precede each subsequent statement of responsibility by a semicolon.
Precede the ISSN of a series or subseries by a comma.
Precede the numbering within a series or subseries by a semicolon.
Enclose a date following a numeric and/or alphabetic designation in parentheses.
Precede the title of a subseries, or the designation for a subseries, by a full stop.
Precede the title of a subseries following a designation for a subseries by a comma.
For the use of the equals sign to precede parallel statements, see the appropriate rules.

1.6B. Title proper of series

1.6B1. If a bibliographic resource is issued in a series, transcribe the title proper of the series as instructed in 1.1B (see also 12.1B).

(Virago modern classics ...)
(Great newspapers reprinted ...)
(The king penguin books)
(Al street atlas series)
(Bartholomew world travel series)
(Master choruses for Lent and Easter)
(Disney storyteller)
(Allstate simulation film library)
(Ecology : communities in nature)
(Fant anthology of literature in Ameslan)
(Listening, looking, and feeling)
(Ward's solo-learn system)
(Practicorp no-nonsense software)
(PCMI collection)
(H.C.)

If the title proper includes numbering as an integral part of the title proper of the series, transcribe the numbering as part of the title proper (see also 1.6G).

(Publication #122 of the Social Science Education Consortium)
(The twenty-sixth L. Ray Buckendale lecture)
(Cuaderno número G del instituto)

For *microforms*, see 11.6B1.

1.6B2. If different forms of the title of the series (other than parallel titles) appear, choose the title given in the first of the prescribed sources for the series area as the title proper of the series. Give the other form(s) in the note area if of value in identifying the bibliographic resource.

If the title of the series does not appear in the first of the prescribed sources of information and different forms appear elsewhere in the bibliographic resource, choose the title given in the other prescribed sources in the order of preference for the sources (e.g., if different forms appear in the second and third sources, choose the one appearing in the second source).

1.6C. Parallel titles of series

1.6C1. Follow the instructions in 1.1D (second level of description) when transcribing the parallel titles of a series.

(Jeux visuels = Visual games ...)

(Quellenwerke der Schweiz = Statistiques de la Suisse)

1.6D. Other title information of series

1.6D1. Give other title information of a series only if it provides valuable information identifying the series. Follow the instructions in 1.1E when transcribing other title information of a series.

(English linguistics, 1500-1750 : a collection of facsimile reprints ...)

(Words : their origin, use, and spelling ...)

1.6E. Statements of responsibility relating to series

1.6E1. Transcribe statements of responsibility appearing in conjunction with the series title only if they are considered to be necessary for identification of the series. Follow the instructions in 1.1F when transcribing a statement of responsibility relating to a series.

(Nouvelle collection / Maurice Le Lannou)

1.6F. ISSN of series

1.6F1. Give the International Standard Serial Number (ISSN) of a series if it appears in the item being described (see also 1.6H4). Give the ISSN in the standard manner (i.e., *ISSN* followed by a space and two groups of four digits separated by a hyphen).

(Western Canada series report, ISSN 0317-3127 ...)

1.6G. Numbering within series

1.6G1. Give the numbering of the bibliographic resource within the series in the terms given in the item. Use abbreviations as instructed in appendix B and numerals as instructed in appendix C.

12.6G. Numbering within series

12.6G2. For *serials*, do not give series numbering if each issue or part is separately numbered within the series.

(Acta Universitatis Stockholmiensis)
(*Each part is separately numbered*)

(Public Health Service publication ; no. 1124)
(*Each issue of the serial carries the same series number*)

12.6K. Change in series statement

12.6K1.

- a) ***Serials.*** If a series is added, deleted, or changed on a subsequent issue or part and this change cannot be stated clearly in the series area, make a note if the change is considered to be important (see 12.7B14.2).
- b) ***Integrating resources.*** If a series is added, deleted, or changed on a subsequent iteration, change the series area to reflect the current iteration and make a note if the change is considered to be important (see 12.7B14.2).

D. Appendix: Analysis of the Area 6 Rules

Unique rules in Chapter 1

Basically, *all* of the rules in Chapter 1 are unique, since the rules in the other chapters consist of a reference back to 1.6:

Unique rules in Chapters 2–12

The following rules are unique in Chapters 2–12:

Chapter 4, Manuscripts

- ✓ “This area is not used for manuscripts.”
Recommendation: Add Area 6 rules to Chapter 4.

Chapter 11, Microforms

- ✓ **11.6B1:** The rule has distinct provisions for series in which the microform appears and (for reproductions) for series in which the original appeared.
Recommendation: Retain.

Chapter 12, Continuing Resources

- ✓ **12.6B1:** A special provision instructs the cataloger not to give the numbering of individual issues of a serial as series numbering.
Recommendation: Retain.
- ✓ **12.6B2:** Chapter 12 contains rules on changes in series statements.
Recommendation: Retain.

Inconsistencies Across Chapters

- ✓ **Structure of rules in Chapters 2–12:** Unlike other areas, the rules for series in Chapter 2–12 are *not* broken down by specific data element.
Recommendation: Make it consistent, but wait for JSC decision before deciding *how*.
- ✓ **Examples:** The examples in Chapters 2–12 are surrounded by parentheses, those in Chapter 1 are not.
Recommendation: Add the parentheses (and bold ellipses to indicate omission of series numbering) to the examples in Chapter 1.
