Q: Are you adding standard identifier 024 7 _ to these NACO records when you find the information from VIAF?

A: Very good question! We generally have not been adding the identifiers from VIAF to the 024 field in the NACO records. The VIAF ID will be in the URL in the 670 |u if we have added information to the records from VIAF, but that is usually the only place we reference it. There is the possibility that either LC or OCLC could do a batch update to put VIAF IDs in any NACO record that has been contributed to VIAF. There have been talks of doing this, but I don't know for sure if it will actually happen or not.
